Experience

Application Developer
IBM — Armonk, NY 4/2018 - Present

Preform & maintain daily extraction & aggregation from various internal data sources to provide a comprehensive dataset for use by IBM's internal reporting functions for use by management, audit, application owners and etc.

Engineering Fellow
General Assembly — New York, NY 9/2017 - 12/2017

Dedicated over 400 hours to learning about the ins & outs of full-stack web development and learning the importance of team collaboration. From coding as a hobby, understanding the fundamentals to building full-stack web applications, I have learned to solve problems with code while applying industry best practices in a collaborative environment.

Computer Lab Assistant
School of Visual Arts — New York, NY 1/2017 - 4/2017

- Aided with technical troubleshooting
- Maintained classrooms hardware & software
- Supported system administrators with assigned tasks
